

Ojash Prasad

Bengaluru, India | ojashpd31@gmail.com | +91-9636111078 | [linkedin.com/in/ojash-prasad](https://www.linkedin.com/in/ojash-prasad)

Skills

- **Data & Tools:** SQL, Excel, Google Sheets, Python, Power BI (KPI dashboards, funnel tracking), Jupyter Notebook
 - **Analysis:** Funnel Analysis, Metrics Definition, A/B Testing, Data Interpretation
 - **Product Thinking:** User Research, PRD Writing, RICE Prioritization, Problem Structuring
 - **Execution:** Stakeholder Management, Cross-functional Collaboration, Process Automation
-

Experience

Amazon — Data & Process Analyst (Quality)

Oct 2023 – Present | Bengaluru

- Identified a critical SOP visibility gap impacting team efficiency; designed and deployed a Slack-based automation system that created a real-time, timestamped knowledge repository — resulting in **zero missed updates post-deployment**
 - Built and maintained structured datasets across 5+ workflows and key performance metrics, enabling leadership to track performance and make data-driven decisions
 - Consistently maintained **99% quality accuracy** by implementing structured tracking, issue escalation frameworks, and process documentation
 - Translated recurring operational issues into actionable insights and improvements, reducing ambiguity in workflows and improving execution clarity
 - Coordinated cross-functional stakeholders for quarterly All Hands (100+ attendees), ensuring alignment across operations, leadership, and execution teams
-

Projects (Product & Data Focused)

MedRefill — AI Medicine Tracking & Auto-Reorder Agent

- Designed an AI-powered system to track medicine consumption, predict refill timelines, and trigger automated reorders via API integrations
- Conducted user research and identified key friction points such as adherence fatigue and prescription variability
- Built logic-driven workflows and evaluated unit economics, demonstrating strong problem-solving and structured thinking

Zepto Customer Support Redesign (Case Study)

- Conducted primary user research (20+ responses) to identify drop-offs in customer support funnel
- Identified **human escalation gap** as the primary failure point through structured analysis
- Prioritized solutions using RICE framework and proposed in-chat escalation feature with full PRD and cost model

WrappedMonthly — Spotify Analytics Add-on

- Defined product vision addressing user engagement gap in Spotify's annual analytics model
 - Designed metrics framework and prioritized features using RICE methodology
 - Delivered complete PRD and dashboard prototype demonstrating product thinking and execution
-

Education

B.E. Computer Science Engineering
Visvesvaraya Technological University — CGPA: 9.49/10

Certifications

- AI Fluency Framework & Foundations — Anthropic (2026)
 - Product Management Certification — IIBA (2025)
 - SQL for Data Engineering — LinkedIn Learning (2026)
-

Key Strengths (Aligned to Role)

- Strong ability to convert data into actionable insights
- Proven experience in identifying gaps and building scalable solutions
- High ownership mindset with execution focus
- Ability to work across teams and translate data into business decisions
